**Remarks:** On 10 October, General Walters, as Acting Director of Central Intelligence, authorized circulation of DCID 1/7, "Control of Dissemination of Intelligence," to the USIB for consideration. All USIB agency members have submitted their concurrence or comments. The NSA, Treasury and FBI members have concurred.

The Acting CIA member has withheld his concurrence pending a review by the Security Committee of whether NOFORN markings should be placed on appropriate USIB and IRAC documents, review of paragraph 6. a., and change of WINTEL to WNINTEL [paragraph 4. a. (1)].

The Acting State member concurred, but stated that certain aspects of the proposed directive present problems for State and, therefore, requested a review of the directive in an appropriate forum.

The Acting DIA member, while not identifying any specific problem, recommended that the subject DCID be remanded to the Security Committee for staffing and recommendation to the USIB.

The AEC representative to USIB expressed his concern with the DCID 1/7 revising the CONTROLLED DISSEM intelligence caveat to "NOT RELEASABLE TO CONSULTANTS OR CONTRACTORS." His concern is that such a caveat will perhaps be interpreted in a very narrow sense and thus be counterproductive to the use of the national nuclear laboratories in their intelligence support role to the AEC and other USIB agencies. General Giller's letter and a draft response is attached.

Because of the above concerns expressed by the USIB members, it is recommended that DCID 1/7 be referred to the Security Committee for review and resubmission to the Board following consideration of these issues. If you approve this recommendation, please sign the attached response to General Giller's letter.
